TO HELP YOU SELL

Milcor furnishes to qualified dealers without charge a number of attractive Display Boards which can be used in making visualized sales talks to customers. These colorful boards are powerful sales stimulators.

Also available are circulars describing almost every one of the many Milcor Products. A reasonable quantity will be sent with your name and address imprinted upon receipt of a written statement outlining the use to be made of this advertising material.

Your Milcor representative will be glad to show you copies of the circulars and Display Boards. For immediate information write to the Advertising Department.

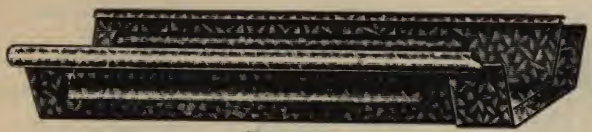
KUEHN'S SQUARE GUTTER

7 Exclusive Features

Precision manufacture makes KUEHN'S GUTTER straight and true. Every length is perfectly formed, fits every other length and every accessory like a glove, making a quick, easy job of hanging. Labor costs for installation are no more than for ordinary Half Round.

Patent No. 109,144



SLIP JOINT

LAP JOINT

PROFILES SHOWING DIMENSIONS OF SLIP AND LAP JOINTS

OF STRENGTH AND BEAUTY

1. Outer bead has stiffening tongue.
2. Decorative flute on outside adds strength and beauty.
3. Perfectly formed outside corners.
4. Decorative reinforcing flute on bottom.
5. Precision manufacture makes trough straight and true.
6. Flute on inner side reinforces.
7. The inside edge is hemmed for strength and easy handling.

Overwhelming Acceptance by the Trade and Public

On every side you hear praise for KUEHN'S GUTTER. Sheet Metal Men who have tried it and used it know that it does the trick to help get business. Home owners are pleased with its strength and appearance.

EXPANDED METAL STRAINERS FOR HALF-ROUND EAVES TROUGH

NEAT—MORE EFFICIENT

Do a better straining job—preventing debris from clogging drain pipes—yet permitting a maximum flow of water. The strainer does not protrude above the gutter but is neatly tucked away from exterior view.

PRICES PER DOZ.

4"	5"	6"
$2.78	$3.82	$4.50

A charge of 20% will be made when shipped in less than crate lots. Full freight allowed only on lots of 500 feet or more within territorial boundaries.

No freight allowance on shipments of less than 500 linear feet.

NEW — ONE PIECE MITRES

Milcor Eaves Trough Mitres are exceptionally well made. The one piece design insures long life and leakproof construction. They fit the Eaves Trough perfectly and are easy to install.

MILCOR INTERLOCK CONDUCTOR PIPE

CORRUGATED ROUND

PLAIN ROUND

Full 10 foot lengths. 1½ and 2½-inch sizes and 7-inch and larger in Plain Round only.

Interlock Conductor Pipe, made in three styles, is precisely straight. Milcor's intricate machines shape the pipe, form the "Interlock" and seam it under pressure in one operation. The interlock seam forms a strong, watertight joint.

Milcor Conductor Pipe is now made with an improved Crimp-end which facilitates the application of elbows and fittings.

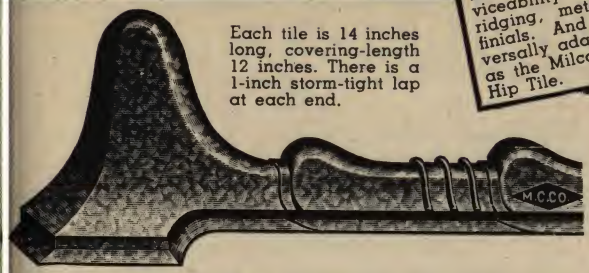
The 922 Family

RIDGE AND HIP TILE

No roof is complete in appearance or serviceability without metal trimmings—metal ridging, metal hips, metal valleys and finials. And no roof trimming is so universally adaptable, practical and pleasing as the Milcor No. 922 series of Ridge and Hip Tile.



Each tile is 14 inches long, covering-length 12 inches. There is a 1-inch storm-tight lap at each end.

The Milcor "922 Family" is suitable to all types of roofs and practically any style of building. These metal trimmings make for complete satisfaction on the roofs of bungalows, residences, apartments, churches, schools, and store buildings. Wooden shingles, composition shingles, roll roofing and other types are made weather-proof and storm-tight with the Milcor "922" series Ridge and Hip Tile, Starters, Finials, Valleys and Joints.

The Tile are 14 inches long and lay 12 inches to the weather, are adjustable and no cutting is necessary.

12 Ft.	26.000	27.500	24.

ROOFING TABLE—PRICE PER SHEET

24" Column covers all Roofing where number of square feet is computed on a 24" width. (V Twodrain, 2V Crimp, 3V Crimp, 5V Crimp, Pressed Standing Seam, etc.)

26" Column covers all Roofing where number of square feet is computed on a 26" width. (Covering Regular 1¼" and 2½" Corrugated and 1¼" Non-Syphoning Corrugated.)

To find prices per sheet on any standard length at a given price per square, locate price per square (net) in column with that heading, and read horizontally to the column headed by the sheet length on which price is wanted.

Perfect Lap

Here's the Supreme Achievement in Steel Roofing

Greater protection WITH THESE MILCOR features

Milcor Two-Drain Channe is the finest Side-Lap d sign for steel roofing. has two large channels wit a high ridge between the as well as a smaller ridg before the first channe forming the most effe tive protection ever mad against wind-driven ra at the side laps.

The "PERFECT LAP" makes a tight lap at the end the sheet as soon as it is applied to the roof. More over, the design is such that the lap is actually tigh ened as the roof expands and contracts due to temper ature changes.

CHECK THESE EIGHT BIG ADVANTAGES

1 **FOUR BARRIERS TO WATER AT SIDE LAPS**
   a. Extra protective ridge forming first seal against leaks.
   b. Large channel.
   c. High ridge contacting overlapping sheet.
   d. Second large channel.

2 **TWO LARGE CHANNELS**
The second channel is as deep and complete as the first.

3 **ONLY ONE ROW OF NAILS FOR EACH SHEET**
The double bracing of the rib prevents injury to the leak-proof feature.

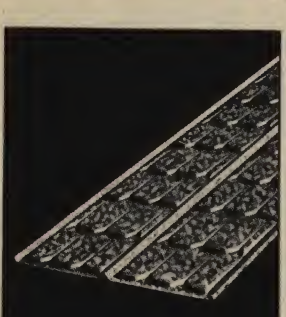
4 **"PERFECT LAP" FEATURE PROTECTS END LAPS**
Special construction assures a constantly tight lap in spite of contraction or expansion of metal.

5 **THE MOST COMPLETE LINE OF FITTINGS AVAILABLE**

6 **EASY TO APPLY**

7 **FULL 24-INCH COVERAGE**
There is no waste of material.

8 **EXTRA HEAVY ZINC COATING**



ORNAMENTAL TWO-DRAIN CHANNEL ROOFING

The stamped sheets give the impression of a shingled roof. End laps are made by a perfect nesting of one row of shingle designs of the overlapping sheet upon corresponding shingle designs of the lower sheet which makes an end lap of approximately 6 in.

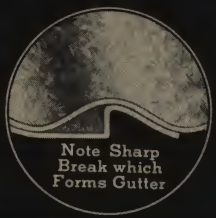
Perfect Lap "Twodrain" CHANNEL ROOFING

MILCOR NON-SYPHONING 1¼ INCH CORRUGATED ROOFING



THE NON-SYPHONING FEATURE PREVENTS LEAKAGE AT SIDE LAPS

SPECIFICATIONS

Size of corrugation 1¼ in. 26 in. wide, covers 24 in.

Stock lengths, 5, 6, 7, 8, 9 and 10 ft. Special Lengths 11 and 12 feet.

Made in No. 29 and No. 28 and No. 26 Gauges Galvanized Steel and No. 28 and No. 26 Gauges Galvanized Copper-Alloy Steel, Inland Pure Iron and Armco Ingot Iron.

The Non-Syphoning feature is built into this roofing by the sharp break made in one of the lower corrugations of the side lap. This break produces an air space which offsets syphoning.

Any seepage that may occur from a driving rain, or from the corrugations being banked with snow, is carried away by the small gutter formed by the break. The capacity of the gutter is much greater than is necessary to carry all the water that may be driven over or through the corrugation.

Prices per Square in Galvanized Steel

	Less than 50 Sqs.	50 Sqs. or more
29 Gauge	$7.38	$7.14
28 Gauge	7.60	7.34
26 Gauge	8.32	8.04

11 and 12 foot sheets 20c per square extra.

Above can also be furnished in No. 28 and No. 26 Gauge Galvanized Copper Alloy 2 oz. Coating Seal of Quality grade. Each sheet carries Zinc Institute Steel of Quality stamp.

CORRUGATED ELEVATOR SIDING

1¼" — 2" — 2½" Corrugated

Sheets are laid in such a manner that the elevator sides have a chance to settle without disturbing the fastenings of sheets. Our 2 and 2½ inch Corrugated Sheets are 26 inches wide by 32 inches long, and cover 24 inches. 1¼ inch Corrugated Sheets are 26 inches wide by 32 inches long and cover 24 inches. The sheets are laid with a 2 inch end lap and the nails are two inches above the upper edge of the lower sheets, thus allowing the sheets to slip 2 inches in every 32 inches as the sides of the elevator settle and will not buckle or draw the nails.

MILCOR TINNERS RED

Will not blister or peel. Furnished from stock in 1 gallon cans.

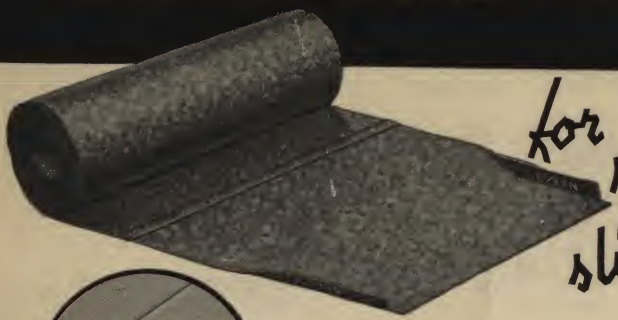
Price, per gallon $3.00

This is to be used as a priming coat only.

See Page 35 for Roofing Tools.

F. O. B. Canton, Ohio.

MILCOR ROLL ROOFING



for roofs with slight pitch

All Milcor Roll Roofing is double Cross Locked together, notched and resquared on ends and sides. Sheets 26½" wide, 50 ft. long, will cover 100 square feet.

All prices F. O. B. Pittsburgh, Pa.

MILCOR SELF-CAP

Made from sheets 26¾ inches wide before resquaring. Appropriate for use on buildings with slight pitch. Made from soft annealed sheets so that the side seams form easily. Cleats furnished only when ordered.

Detail of Seam at Left.

Prices and Weights per Square Without Cleats

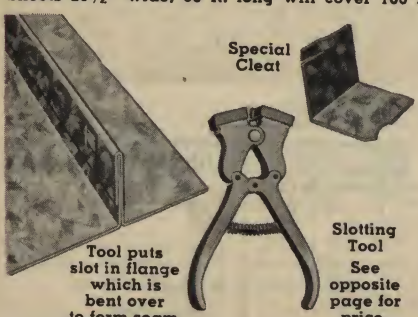
KUEHN'S LOCK SEAM ROLL ROOFING

NOW MADE WITH NEW TYPE CLEAT WHICH SIMPLIFIES APPLICATION

This roofing is made from sheets 26¾ inches wide before resquaring. Double Cross locked together, notched and resquared on ends and sides. This roofing is so constructed that the cleats after being applied are unexposed, and the caps are made from part of the sheet, doing away with separate caps. Kuehn's Lock Seam Roll Roofing can be used on roofs with only a slight pitch. Sheets 26½" wide, 50 ft. long will cover 100 square feet.



Prices and Weights per Square With Cleats

1¾	105	.24	3	65	.23
2	90	.24			

② Anchor Shank Lead-Head Nails

"Anchor" nails not only keep the roofing tight, but also, because of their soft lead heads, permanently seal and plug the nail-hole against moisture and leaks. The body of this nail carries a series of raised, anchor-like rings which imbed themselves in the wood. These anchors prevent any pull or twist after the nail has been driven. Tests prove that "Anchor" nails hold **four** times better than ordinary nails.

Packed in 50 lb. Cartons

Requires approximately 1 lb. to square of Roofing

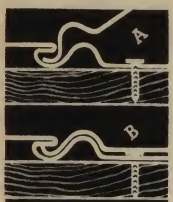
SPANISH METAL TILE

for roofs of Distinction



Here is beauty and charm plus good construction. Milcor Spanish Metal Tile is the most practical adaptation of this popular architectural motif in roofing.

Easily finished in any color scheme desired—preferably red or green—this roofing lends itself ideally to the general artistic scheme of the building. It is universally accepted as good taste.

EXCLUSIVE TITELOCK FEATURES

A. No special tools are required. Hook the flange into the groove of the tile preceding, then lay it flat.

B. As it is laid flat, it locks tightly. All nail holes are covered by the overlapping tile. Absolutely leakproof.

Weighing only one-eighth as much as clay tile and, therefore, requiring only a light supporting structure, a substantial saving in time, labor and materials is obtained.

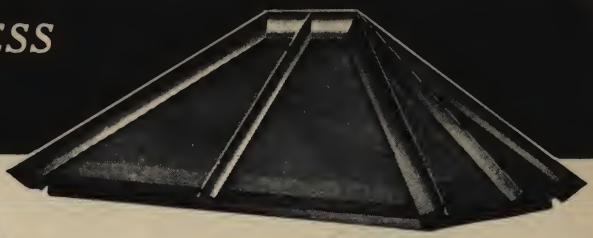
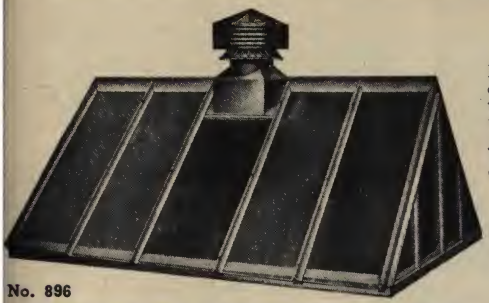
PUTTYLESS MODELS





No. 896

Double Pitch, with "NU-AIR" Ventilator and Glass Ends.

No. 895

Double Pitch, with Louvre Ventilator on Ends.

Our PUTTYLESS SKYLIGHTS are made of 26 gauge open-hearth galvanized steel with proper ventilation and condensation gutter. Simple and strong in construction.

Any Size Made to Order.

No. 897—Hipped

The No. 897 has all the features of other Milcor Puttyless Skylights plus the advantage of the additional light afforded by the hip construction. Frames are made to fit over wood curb.

Skylights will be shipped complete with Vents and Dampers, as illustrated unless otherwise specified.

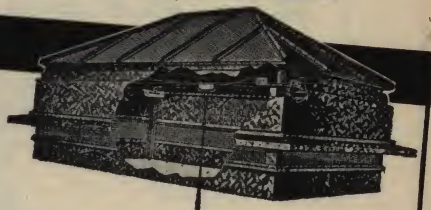
F. O. B. Milwaukee, Wis.



GALVANIZED
No. 900 Hipped
Shown in Catalog
Fire-proof, Automatic, and Non-Fire Draft

Exterior view, with section broken away showing interior construction.

The "Torpedo" combines with the ordinary types of skylight tops a Ventilator provided with a movable shutter regulating the amount of ventilation. The opening is protected with coarse mesh wire screening.

The movable shutter operates between the inner side of upper casing and the outer side of wire screen and is raised to open by pulling the chain and held in place by fastening inside; it is lowered to close by releasing the chain.

"KONICAL" VENTILATORS

The "Konical" Ventilator is built upon a vacuum principle. It has a stationary cap which is acted upon by the natural currents of the air. The construction of the "Konical" ventilator manipulates these currents in such a way that a partial vacuum is created causing an immediate upward draft which carries away all gases, smoke or foul air. It has greater capacity . . . it is wholly storm proof . . . This efficiency coupled with its fine construction and ornamental appearance has gained unusual popularity for Konical Ventilators.

In ordering, bear in mind that the ventilator should have as great a capacity as the flue or opening upon which it is placed.

NU-ALPINA VENTILATORS

SYPHON REVOLVING VENTILATOR

The cross section ot the Nu-Alpina at the left shows the design of this Ventilator. It has braces on each side of the vane, rod reinforcement around the mouth of the exhaust, and a seamless tube reinforcement which holds it in place when revolving with the wind. Braces provide for additional stability and free swing of the upper section. The non-rustable, fully encased ball-race is also thoroughly braced, as is the perpendicular shaft and cross bar on which it rests. Nothing lighter than 26 gauge galvanized steel is used in fabrication.

The Milcor Nu-Alpina Ventilator utilizes wind currents to withdraw foul air from the interiors of industrial buildings. The vane at the top of the ventilator is caught by the slightest motion of the air, and swings the entire revolving head into position so that the opening faces away from the wind. A vacuum is created over the end of the flue which forcibly draws out the foul air and prevents the possibility of down draft regardless of wind direction.

F. O. B. Canton, Ohio.

BARN BATTEN STRIPS

Style "A"

Style "B"

The use of these metal batten strips is an economical and practical method of weather-proofing barns, sheds and other buildings on which the outside boarding is applied vertically.

Galvanized Steel, 6, 7, 8, 9, 10 and 12 foot lengths, with nail holes punched every 12 inches.

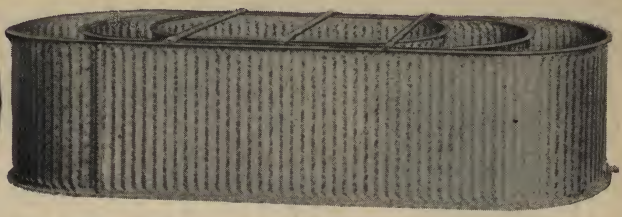
Outer edges turn down, preventing rain or storm from driving under the strip. Center bead fits into the crack.

PRICE PER 1000 FT.—$22.00

Crated 1000 ft. and 500 ft. to crate.

Freight allowed on quantities of 1000 ft. or more.

Corrugated Steel STOCK WATERING TANKS



ROUND END WATERING TANKS

Milcor Stock Watering Tanks are made of No. 20 gauge corrugated galvanized sheet steel. The 1½-inch side corrugations add extra strength and allow for the expansion of freezing water. Milcor Stock Tanks will not warp or crack — they are easy to move and clean and are practically indestructible.

Seams on all Milcor Tanks are waterproofed with reinforced elastic packing and seamed under pressure. These seams are made permanently watertight without solder, by riveting them with heavy ⅜-inch rivets spaced 1½ inches apart.

Tanks shipped nested take a lower rate.

The RE-"B" tanks are made to nest with the regular RE tanks, giving you the advantage of many nesting combinations.

Spanish texture

Milcor Spanish Texture is in a class by itself as far as Steel Ceilings are concerned. When this material is properly applied it is impossible to determine that it is not a genuine Spanish Textured Plastered Ceiling except upon the minutest inspection. Spanish Texture Steel Ceilings are so lovely to look at that the most discriminating interior decorators cannot help but appreciate their beauty.

CORNICES AND FILLERS

PERMANENT *fire-safe* CONSTRUCTION

Milcor "Invisible Joint" Metal Ceilings and Walls have been steadily increasing in popularity for more than a quarter of a century. Recent developments in modern design together with new practical ideas for application now make them unsurpassed in producing fine, artistic effects adapted to every type of structure from homes to skyscrapers.

Architects, contractors and owners have for years appreciated the advantages of Milcor Metal Ceilings and Walls. The best thought and skill of the most accomplished designers and artisans in ornamental metal are embodied in each Milcor unit. The motifs are authentic, their detail correct, their treatment finished.

LOCK JOINT
FURNACE PIPE
Locks Automatically Without Tools

"TITELOCK"
FURNACE PIPE
Seam Closed With Mallet — Note Non-Collapsible End

Specify whether Lock-joint or Tite-lock closing is wanted on pipe.

Pipe is shippedK.D. in 25 joint bundles.

For crating there is a net minimum charge of 35c for orders under $5.00 and 50c for orders between $5.00 and $10.00.

GALV-CORRUGATED ONE-PIECE ELBOW

GALVANIZED FURNACE PIPE and ELBOWS

Milcor Galvanized Pipe and Elbows are made in sizes from 3 inches to 30 inches in diameter. Larger sizes made to order. Milcor Galvanized Pipe is always shipped K. D unless otherwise ordered.

THE FINEST ELBOWS MADE

These Husky Elbows won't leak. The swedging on the segments is too deep to allow it, and the resulting better joints make for easy adjustment, too.

28 and 26 gauge Elbows and Angles 4 to 14 inch, are seamed; heavier gauges are riveted.

"FADE-AWAY" CRIMP

Makes pipe and elbows easier to put up. The rounded, tapering crimp slips into the next joint or elbow without fuss or effort; and, when pressed home, tightens to hold in a firm, solid union.

PRICES—Pipe per foot—Elbows and Angles per piece.

FURBLO AIR CONDITIONING UNITS

FURBLO CABINET UNITS are distinctly a QUALITY product — not to be confused with "cheap" units. They are built up to high standards—not down to a price.

All FURBLO CABINET UNITS are COMPLETE—ready to install as part of a warm air mechanical heating system. They consist of blowers, motors, filters, variable speed pulley, belt and furnacestat—in attractive cabinets. Standard finish is green crystal. Special finishes can be had where quantity warrants.

FURBLO CABINET UNITS for air cleaning and air circulation may be installed as part of either the new or the old warm air system. They are supplied complete with Blower (not a propeller type fan), Drive (includes variable speed motor pulley), Motor Filters, Cabinet, silencing connections and Furnacestat—ready to install for quiet and automatic operation.

Prices on application.
F. O. B. Hermansville, Mich.

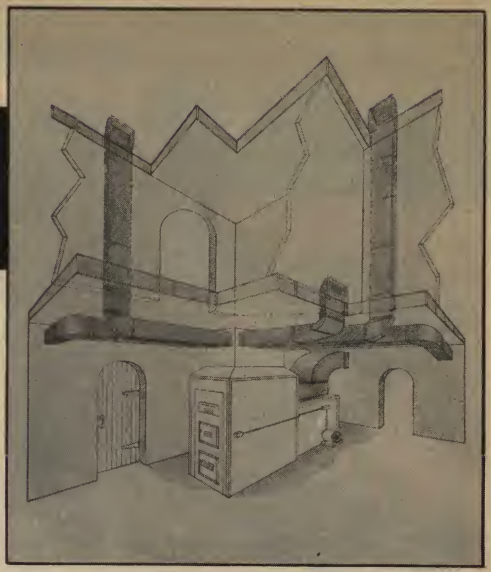
PIPE & FITTINGS FOR FORCED AIR SYSTEMS



PHANTOM VIEW OF FORCED AIR SYSTEM

The illustration at right shows the Square Ducts, Elbows, Wall Stack and Register Heads in their relation to the heating and conditioning plant.

The products listed herein are designed to meet the general needs of a wide variety of modern Air Conditioning Plants, Trunk Line Systems, and other types of mechanical heating. Principal fittings are shown here. Prices of the entire line are given.

ONSTRUCTION—The bars are set into the frame, ad may be rotated through an arc of 90°, i.e., ° either way from straight. The bars of each section are connected with each other so that any bar of a section is turned, the bars in the ire 2" section turn simultaneously. The link connecting the bars in each section is ovided with a friction device which securely lds the bars in any position in which they are t, but permits the bars to be readily turned for y desired deflection by means of a key pro- ied with each grille or register incorporating ese designs.

Designed for FORCED AIR SYSTEMS

ADJUSTABLE BAR TYPE REGISTERS

By turning one bar the entire 2" section is turned. This fea- e reduces the time and labor required to secure the desired ustment and insures uniform adjustment of the bars.

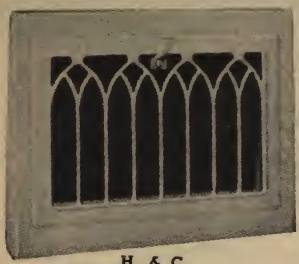
A. on or east of a line drawn from Duluth, Minnesota, through Minneapolis, Minnesota, to Sioux Falls, South Dakota, thence south along the western boundaries of Iowa, souri, Arkansas, and Louisiana. To points west of the above line, freight will be allowed to crossing on this line nearest to a line drawn between Holland, Michigan, and destination. NOTE: Above registers and intakes carried in stock. Other styles of Hart & Cooley Forced Registers and Intakes shipped from factory. Prices on application.

H&C BASEBOARD REGISTERS WITH REMOVABLE FACES

FOR WARM AIR SYSTEMS
See Catalog No. 35-A



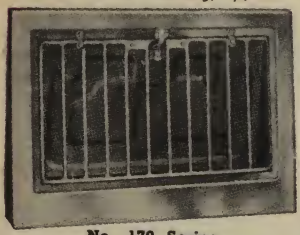
H. & C. Baseboard Register Series No. 120

Has quickly detachable face. Permits installation with stackhead over lapping frame. Stackhead openings 2¼" from floor.

H. & C. Baseboard Register Series No. 150

This is a two-piece register with face that is removable by a quarter turn of the locking buttons.

The oblong hole perforations make it more efficient than other plain lattice design registers. Height from floor to face opening, 2¼ in.



No. 170 Series

This register, with quickly detachable face, is made in formed bar design to give the greatest possible free face area consistent with proper protection of opening. Size 8 x 12 has free face area equal to capacity of 10" pipe.

Height from floor to stackhead opening is 2¼".

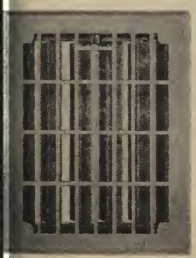
No. 200—Patented

No. 200 is not only unequalled in air capacity, but is also exceptionally strong, rigid and durable. Supporting bars of heavy gauge steel reinforce the face. Valves have solid trunnions securely fastened to each end, insuring free and easy operation and long life.

No. 270 REGISTER—SEMI STEEL—PEBBLED



No. 270 PEBBLE Semi-Steel

The pebbles protect the finish from surface wear. Body is steel, multiple valve. For Pebble Face only, without register bodies, specify No. 272. Made in the sizes shown only.

For Pebble faces only, without register bodies, specify No. 272.

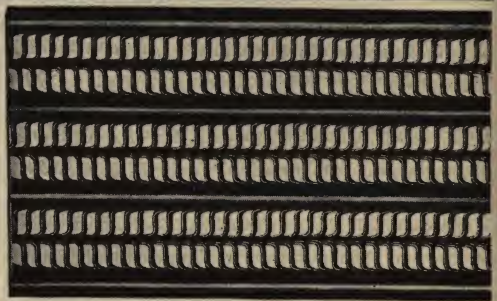
KUEHN'S SPECIAL MESH
METAL LATH
(LEFT)



Kuehn's Specialmesh is Milcor's finest metal lath. There are 16 reinforcing ribs to a sheet, each 1½ inches apart. They are corrugated to make them doubly rigid. The mesh is scientifically designed to secure adequate plaster key and assure proper metal surface for effective reinforcement and for economy in the amount of mortar used.

Prices—Kuehn's Specialmesh and Stay Rib Lath No. 1 (⅛-in. Rib)

No freight allowed on Orders for Less than 100 Square Yards.
Kuehn's Specialmesh and Stay-Rib Lath No. 1 Cut from Copper Alloy Steel, 2c extra per square yard.
Kuehn's Specialmesh and Stay-Rib Lath No. 1 Painted, Cut from TONCAN IRON. Add 8c per sq. yd. to 3.40 lb.
Kuehn's Specialmesh and Stay-Rib Lath No. 1 are made in sheets 24x96 inches, 1-7/9 Square Yards each packed nine sheets, sixteen Square Yards per bundle.

We Do Not Break Bundles

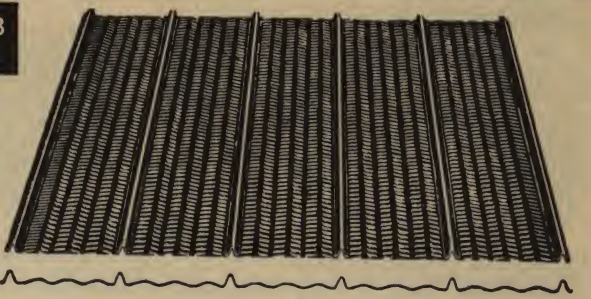
STAY-RIB No. 1 METAL LATH

Has reinforcing ribs ½ inch wide and 1¾ in. apart, center to center. This gives a rigid, flat, strong lath, permitting extra wide spacing of studs joists or channels and effecting a big saving in both labor and material. For both ceiling and wall reinforcement Milcor Stay-Rib No. 1 is unusually satisfactory.

LATH

DELIVERED PRICES BY ZONES AND EXCEPTIONS AS SHOWN ON PAGE 69

3/8 - INCH STAY - RIB No. 2



Milcor Stay-Rib No. 2 Metal Lath has heavy ribs, 3/8 inch high, spaced 4.8 inches from center to center with five stiffening members between each rib as reinforcement for the connecting strands.

Stay-Rib No. 2 is used as a self-furring plaster base for walls and ceilings. The ribs fur the lath 3/8 of an inch out from the studding.

Prices—Per Square Yard

STEELKRAFT-METAL LATH & KRAFT PAPER

Heavy, water - proof paper used as standard for Steelkraft backing. Other types of paper, however, may be obtained for use in special projects.

Netmesh or Smalmesh Lath in Flat type or Furlath and Kuehn's Special Mesh Lath only types that can be used.

Cost is only 10c per square yard extra.

MILCOR INDUSTRIAL MESH

Expanded and Flat Expanded Metal For Window Guards, Partitions, Shelving, Safety Guards

Made from a single sheet, Milcor Expanded Metal has far greater strength and rigidity than welded or woven material. The strands are clean and smooth and they will not ravel or loosen. Expanded Metal can be readily formed into any desired shape and the pieces may be cut in any direction without weakening the material.

Expansion CORNER BEAD

FOR PERFECTLY TRUE REINFORCED CORNERS

PATENT Nos. 1,419,232 — 1,482,600

MADE IN 6, 7, 8, 9, 10 & 12 FOOT LENGTHS
NOS. 1 & 5 MADE IN 11 FOOT LENGTH ALSO.

"EXPANSION" CORNER BEADS Nos. 1 & 2

No. 1 Expansion Corner Bead
For Outer Angle of Plastered Wall

No. 2 Expansion Corner Bead
For Inner Angle of Plastered Wall

The exclusive feature of Milcor Expansion Corner Beads is the use of Expanded Diamond Mesh reinforcement in the wings or webs instead of practically solid members as in other types. The wings of expanded metal permit keying the plaster right up to the bead. Every square inch of these wings reinforces the plaster.

Made of Tight-Coat Galvanized Open Hearth Sheets. Crated in approximately 500 ft. lots. Weight per 1,000 ft. crated, 230 pounds.

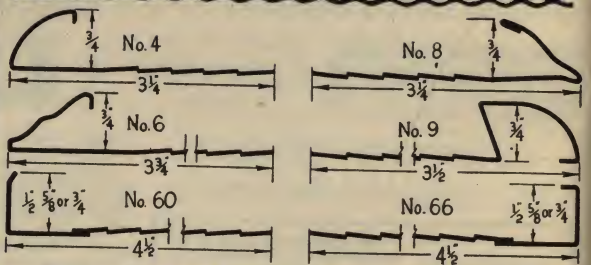
CASING LOCKING CLIP

When used in conjunction with Locking Clip, Casings are punched with 7/16 in. round holes, 3 in. centers. A clip every 12 inches, however, will be ample. In setting, 3/4 in. No. 10 round head screws are driven within, say 1/8 inch of home in the permanent jamb. The casings are then slipped over the screw heads and after lining up are nailed to the buck. Then the Locking Clips are slipped under the screw heads and driven home with any handy tool. This operation locks the Casing immovably down on the jamb.

Clips $7.00 per thousand
In all Zones Delivered.
Shipping weight per 1,000, 15 lbs.

EXPANSION DOOR & WINDOW CASINGS



These casings with Expanded Metal Wings may be had in No. 4 or No. 9, 1/4 Round and No. 8 or No. 6 O. G. Mold. Made for 3/4 in. grounds in 7, 7 1/2, 8, 9, 10 and 12 ft. lengths. They are made from 24 Ga. prime Tite-Coat galvanized sheets, crated approximately 500 ft. to crate. Approximate shipping weight: No. 4, No. 6 and No. 8 Galv., Zinc and Copper per 500 ft., crated, 175 lbs., No. 9 Galv., 220 lbs.

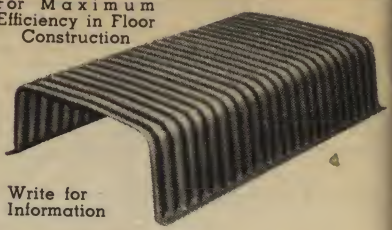
Packed in reinforced paper cartons 1,000 to the carton. Shipping weight 35 pounds per thousand. We do not break cartons.
F. O. B. Canton, Ohio.

MILCOR STEEL DOMES

For Maximum Efficiency in Floor Construction



Write for Information

The MILCOR Steel Dome method of constructing long span floors or roofs of reinforced concrete, accomplishes these practical advantages: Saves 50% to 60% of the concrete ordinarily required for solid-slab construction of the same depth. Milcor Steel Domes are designed with sides tapered to such a minimum degree that a saving in concrete of 6% to 12% over other types of domes is effected.

MILCOR ALL-STEEL MORTAR BOXES

Tables of Sizes and Prices Each

No.	Lgth.	Width	Depth	Gauge Steel	Weight	Cubic Cap'y

See Zone Map and Exceptions on Page 69

The ends of the Box are curved to a radius of 12 inches.

The Milcor Mortar Box is made of No. 16 ga. black iron.

MILCOR EASY-TO-LAY STEEL ROOF DECK

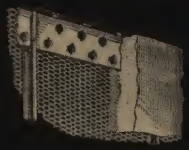
Ribs depressed at one end for perfect lap
Depth of Ribs — 1½ inches or 1¾ inches
Spaced on 6-inch centers
Width of Plate—18 inches
Fabricated from Copper Alloy Steel and Tight-Coat Galvanized Steel.

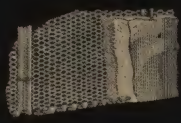
Patent No. 1,969,918

Outstanding advantages of this Roof Deck are its light weight, simple installation, neat appearance, fire-safety and universal application.

Write for prices.

Sensational! New! MILCOR SOLID PARTITION AND FURRING SYSTEM





MILCOR introduces to the Building Industry a new, simplified method of erecting a fireproof plaster base for Solid Partitions. This system also makes possible the erection of an absolutely free-standing Furring Wall. For either Solid Partitions or Furring Walls there is an exceptional saving in time and cost of erection.

3 units

Only three units provide the steel to hold the metal lath in the MILCOR Solid Partition System. These are the Ceiling Angle Runner, the Specially Slotted Channel Stud and the Continuous Crimped Floor Runner.

1 SLOTTED STUD

The slotted studs are furnished cut to length and there is a notch and slot at one end which is readily slipped onto the Ceiling Angle and then the stud is dropped into one of the crimps in the floor runner. The slot is long enough to allow for nearly 2" variation in ceiling heights, making it unnecessary to provide any splices or shoes to care for this.

Weight per 6 foot stud 1.62 lbs. For each additional 6 inches add .135 lbs.

2 CEILING RUNNER

The Ceiling Runner is a 20 gauge angle with countersunk perforations on the long legs and slotted holes for nailing on the short legs. The perforations are staggered 1/2" apart.

Weight per 1,000 lineal feet 350 lbs.

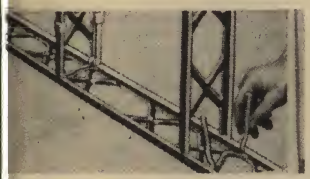
3 FLOOR RUNNER

The floor runner is a 20 gauge crimped strip, these crimps occurring every one inch and with flat spaces 1" long every 12 inches containing a slotted nail hole for attaching to the floors. When the stud is dropped into one of these crimps, it will not move in either direction and these studs can be placed by one man as fast as he can set them in place.

Write for Prices.

Newly Developed!

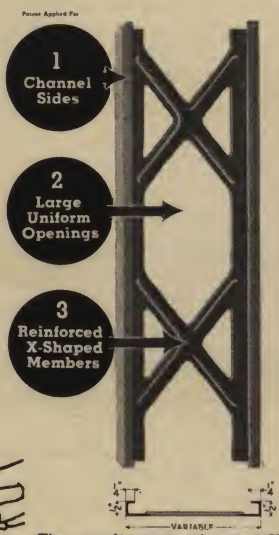
MILCOR HOLLOW PARTITION SYSTEM



The most advanced engineering design and the greatest number of advantages to the user of any type of stud on the market.

The width of the chords in all sizes is three-quarters of an inch. This uniform width permits the use of 3/4-inch furring channels where necessary between studs.

The MILCOR STEEL STUD serves a three-fold purpose—as studding, ceiling runner, and floor track. A 3/16-inch hole in the center of the X member of the floor and ceiling runners make nailing or bolting easy.



The application of the MILCOR SHOE is simplicity itself.

Complete Application of Shoe — With Stud Attached to Floor Runner.
